

TENDULKAR PERUMAL

Java Technical Lead · 8+ Years Experience
Chennai, Tamil Nadu, India

+91 86953 55528 tendulkarbeece@gmail.com https://www.linkedin.com/in/tendulkar-perumal-54746613a/

SUMMARY

Java Technical Lead with **8+ years** of experience in Java, Spring Boot, microservices, REST APIs, and MySQL, with hands-on leadership in AI-assisted development, code review, query optimization, and production debugging. Specialized in AI-Driven Development Lifecycle (AIDLC) practices, leveraging Claude models through GitHub Copilot and OpenAI Codex for end-to-end implementation, complex refactoring, and comprehensive code reviews.

SKILLS SUMMARY

Languages	Java, MySQL, PostgreSQL
Frameworks	Spring Boot, Spring Security, Spring MVC, Hibernate, JPA, JDBC, Thymeleaf
Tools & DevOps	Maven, Git, Docker, Kubernetes, Jenkins, JUnit, Mockito
AI Engineering	Claude Code, OpenAI Codex, GitHub Copilot, Agentic AI, Generative AI, Prompt Engineering, Lovable
Practices	Microservices, REST APIs, SOAP, Agile / SDLC, Code Review, Query Optimization, Unit Testing, Debugging

WORK EXPERIENCE

Java Technical Lead · Neurealm	Nov 2022 – Present
AI-Assisted Leadership: Lead a team of Java developers, running daily offshore stand-ups and mentoring the team on adopting AI-driven engineering practices to improve code quality and developer productivity. AIDLC Implementation: Leverage Claude models through GitHub Copilot across the SDLC for rapid feature implementation, database query optimization, legacy code refactoring, and AI-assisted code reviews. Backend Architecture: Designed secure backend services in Java, Spring Boot, Hibernate, and MySQL, and led migration from standalone Java applications to Spring Boot microservices. Production Reliability: Debug complex production issues via advanced logging, monitoring, and root-cause analysis; lead bi-weekly zero-downtime production deployments. Achievement: Promoted to Java Tech Lead within 3 years for consistent delivery and technical leadership, earning an Outstanding Performance Rating (5/5).	
Junior Software Engineer · Infoview Technologies (IVTL)	Jun 2018 – Nov 2022
Contributed to a 10-member team delivering ERP modules for HUE — including a Dashboard Portal, Input Validation Framework, and master-maintenance applications — while improving code efficiency and unit-testing coverage.	

PROJECTS

Remitra — US Healthcare Cloud Platform	40 Months
<i>A GPO- and ERP-agnostic cloud platform streamlining financial processes between healthcare systems and suppliers.</i> - Migrated a legacy standalone Java application to a Spring Boot microservices architecture, improving scalability and maintainability. - Executed large-scale legacy conversions from PHP to Java using Claude Opus, sharply reducing manual rewrite time while preserving core business logic. - Accelerated complex database migrations from DB2 to PostgreSQL via AI-driven automated schema translation and query adaptation. - Implemented automated security fixes and continuous vulnerability patching using specialized AI agents, and automated Spring version upgrades for strict security compliance. - Developed a dynamic discount-calculation service determining supplier discounts based on business rules.	
HUE — ERP Product Development	48 Months
- Worked across the full product lifecycle — analysis, design, implementation, testing, and maintenance — in the SCM division of the HUE product. - Developed and upgraded multiple SCM modules and built the Dashboard Portal, Input Validation Framework, Detail Page Approval, and master-maintenance applications. - Configured and monitored Jenkins CI/CD pipelines for automated build and deployment.	
AI-Assisted Application Deployment	
Architected and deployed a production-grade web application entirely through AI-assisted engineering — exported from Lovable to GitHub, connected a Supabase backend, and deployed on Vercel with automatic deployments, using Claude Code to implement enhancements and debug pipelines.	

EDUCATION

B.Tech / B.E., Electronics & Communication · Sasurie College of Engineering	2018
---	------

CERTIFICATES

- Oracle Certified — Java
- Spring Framework Master — Core, AOP, MVC, Security, REST, Boot, Thymeleaf, JPA & Hibernate
- Complete Guide to GitHub Copilot for Developers — Microsoft Press
